### June 15-19 2020

Learn how Redzone's produce community are achieving unbelievable (in fact, miraculous) productivity results, in less than 90 days, by digitizing their production and QA data collection. Redzone is an easy to learn and use solution that actually builds a culture of teamwork and connects your Production, Quality, and Maintenance teams for dramatic productivity boosts. Put an iPad in the hands of your production workers and you give them a digital identity that enables them to connect to everyone and everyone else so your whole team is pulling in the same direction.

*This platform is just awesome and it is going to bring us together as a team.*

**Brandon Barbieri**  
Director of Operations, Taylor Farms

*This is an engagement tool that leads to Continuous Improvement to drive better production results.*

**Debbie Raddie**  
VP of Operations, Boardman Foods

#### Redzone's Food & Beverage Productivity Benchmark

Our Benchmark report summarizes the results of a controlled study which included 400 mid-sized Food, Beverage & CPG plants in North America. It shows the effect on productivity that occurs with the introduction of a Production System; incorporating lean production techniques with a mobile application to make them stick.

#### Connect with the Redzone Community of Customers

If you are interested in being introduced to other Produce community manufacturer customers in our Redzone Community please come along and let us know and we'll make the introductions. You can find out what their CI/Food Safety challenges were and how they overcame them.

### Just some of Redzone's Produce Community
